Tom Davenport

Tom Davenport is the President's Distinguished Professor of Information Technology and Management at Babson College, the co-founder of the International Institute for Analytics, a Fellow of the MIT Initiative for the Digital Economy, and a Senior Advisor to Deloitte Analytics.

He has written or edited twenty books and over 250 print or digital articles for Harvard Business Review (HBR), Sloan Management Review, the Financial Times, and many other publications. He earned his Ph.D from Harvard University and has taught at the Harvard Business School, the University of Chicago, the Tuck School of Business, Boston University, and the University of Texas at Austin.

Five Stages of Analytics Maturity Model

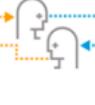

INTERNATIONAL INSTITUTE FOR ANALYTICS.

How to Transition – DELTA Plus

As enterprises commit to harnessing the power of data and analytics to gain a competitive advantage, leaders inevitably ask these questions:

- How **mature** is our organization in its **adoption of advanced analytics?**
- How **capable** are the data and analytics **teams** who **deliver these products?**

The DELTA Plus model has become the industry standard for addressing these questions, and to make real progress toward becoming more data-driven.

	<u>DATA</u>	BREADTH, INNOVATION, QUALITY
	<u>ENTERPRISE</u>	APPROACH TO MANAGING ANALYTICS
	<u>LEADERSHIP</u>	PASSION AND COMMITMENT
	<u>TARGETS</u>	FIRST DEEP, THEN BROAD
	<u>ANALYSTS</u>	PROFESSIONAL AND AMATEURS
	<u>TECHNOLOGY</u>	APPROACH, ORIENTATION, VELOCITY
	<u>ANALYTICS TECHNIQUES</u>	SOPHISTICATION, DIVERSITY

		Stage 1: Analytically impaired	Stage 2: Localized analytics	Stage 3: Analytical aspirations	Stage 4: Analytical companies	Stage 5: Analytical competitors	
	DATA	Data	Inconsistent, poor-quality, and unstandardized data; difficult to do substantial analysis; no groups with strong data orientation	Standardized and structured data, mostly in functional or process silos; senior executives do not discuss data management	Key data domains identified and central data repositories created	Integrated, accurate, common data in central repositories; data still mainly an IT matter, little unique data	Relentless search for new data and metrics leveraging structured and unstructured data (e.g., text, video); data viewed as a strategic asset
	ENTERPRISE	Enterprise	No enterprise perspective on data or analytics; poorly integrated systems	Islands of data, technology, and expertise deliver local value	Process or business unit focus for analytics; infrastructure for analytics beginning to coalesce	Key data, technology, and analysts managed from an enterprise perspective	Key analytical resources focused on enterprise priorities and differentiation
	LEADERSHIP	Leadership	Little awareness of or interest in analytics	Local leaders emerge but have little connection	Senior leaders recognize importance of analytics and developing analytical capabilities	Senior leaders develop analytical plans and build analytical capabilities	Strong leaders behave analytically and show passion for analytical competition
	TARGETS	Targets	No targeting of opportunities	Multiple disconnected targets, typically not of strategic importance	Analytical efforts coalesce behind a small set of important targets	Analytics centered on a few key business domains with explicit and ambitious outcomes	Analytics integral to the company's distinctive capability and strategy
	ANALYSTS	Analysts	Few skills that are attached to specific functions	Unconnected pockets of analysts; unmanaged mix of skills	Analysts recognized as key talent and focused on important business areas	Highly capable analysts explicitly recruited, developed, deployed, and engaged	World-class professional analysts; cultivation of analytical amateurs across the enterprise
	TECHNOLOGY	Technology	Desktop technology, standard office packages, poorly integrated systems	Individual analytical initiatives, statistical packages, descriptive analytics, database querying, tabulations	Enterprise analytical plan, tool and platforms; predictive analytical packages	Enterprise analytic plan and processes, cloud-based big data	Sophisticated, enterprise-wide big data and analytics architecture, cognitive technologies, prescriptive and autonomous analytics
	ANALYTICS TECHNIQUES	Analytical techniques	Mostly ad hoc, simple math, extrapolation, trending	Basic statistics, segmentation, database querying, tabulations of key metrics are leveraged to gain insights	Simple predictive analytics, classification and clustering; dynamic forecasts	Advanced predictive methods deployed to discover insights; advanced optimization, sentiment analytics, text and image	Neural nets and deep learning, genetic algorithms, advanced machine learning

The Transition from Stage 3 to 4

To Stage 3:

The enterprise becomes aware of the value of analytics and more systematic in building and managing resources. Data is both structured and unstructured, is managed in cross-functional warehouses, and is used to support executive decision-making. Senior leaders recognize the importance of analytical capabilities and promote them as a key strategic asset. A small set of strategic or enterprise-wide applications, such as budgeting and forecasting, become priorities.

If stage 3 does not yet describe your organization, please reach out to us regarding a Business Intelligence Maturity Assessment (BIMA) to see where you might stand.

To Stage 4:

The enterprise becomes aware of the value of analytics and more systematic in building and managing resources. Data, both structured and unstructured, is managed in cross-functional warehouses, and is used to support executive decision-making. Senior leaders recognize the importance of analytical capabilities and promote them as a key strategic asset. A small set of strategic or enterprise-level initiatives, and developing and leveraging analyst talent become priorities.

If stage 4 does not yet describe your organization, please reach out to us regarding a Business Intelligence Maturity Assessment (BIMA) to see where you might stand.

RESOURCE

Analytics Maturity Transition Guide: Stage 3 to 4

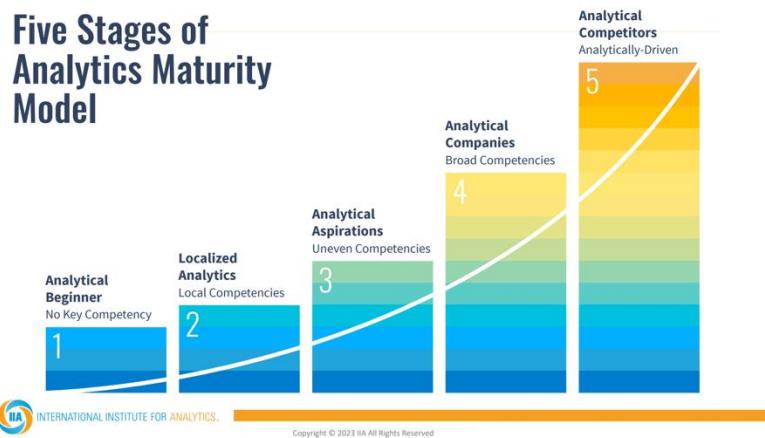

This guide provides a roadmap for organizations moving from Stage 3, where analytical awareness takes root, to Stage 4, where analytics becomes seamlessly integrated into the enterprise.

Datagedreven werken

Greenchoice Datagedreven werken

Het Data & Analytics team is bezig om het data management en data-governance niveau van Greenchoice in kaart te brengen. Met de resultaten willen we onder andere richting geven aan de ontwikkeling van data-architectuur en data-governance binnen de Greenchoice-organisatie. Het doel hiervan is om de gehele organisatie naar een hoger niveau te tillen in het datagedreven werken, met data-architectuur en data-governance als solide basis.

Og 20 september organiseren we een sessie waarin de resultaten zullen presenteren, waarvoor jullie ook worden uitgenodigd.

* Dit formulier registreert uw naam, vul uw naam in.

Start de vragenlijst

De vragenlijst omvat 27 vragen over data management bij Greenchoice. Het inschatten van de vragenlijst zal naar verwachting ongeveer een half uur tot een uur in beslag nemen. Bij een responspercentage van 80%, zullen we dit vieren met een traktatie in het groene hart!

Bij vragen kan je contact opnemen met Didy Bos of Maja Wilders.

Datagedreven werken Survey medewerkers

Greenchoice Survey medewerkers

Het Data & Analytics team is bezig om het data management en data-governance niveau van Greenchoice in kaart te brengen. Met de resultaten willen we richting geven aan het data-gedreven werken binnen Greenchoice. We willen vooral antwoord geven hoe we jullie kunnen helpen (nog) beter data gedreven te werken en wat de organisatie hiermee moeten initiëren.

* Dit formulier registreert uw naam, vul uw naam in.

Start de vragenlijst

De vragenlijst bestaat 12 vragen en het inschatten zal ongeveer 15 minuten in beslag nemen. Bij een responspercentage van 80% zullen we dit vieren met een traktatie in het groene hart! Het kan zijn dat je niet op elke vraag een antwoord hebt, daarom staat bij elke vraag ook de optie 'weet ik niet'.

Bij vragen kan je contact opnemen met Didy Bos of Maja Wilders.

Cultuur & leiderschap

Organisatiedoelen

Strategische afdelingsdoelen

Greenchoice doelen

- Van zonnepanelen- en energieleverancier naar een geïntegreerd productaanbod
- Klant helpen stap voor stap te verduurzamen
- Van reactief naar proactief klantgericht
- Data gedreven en krachtig IT-bedrijf

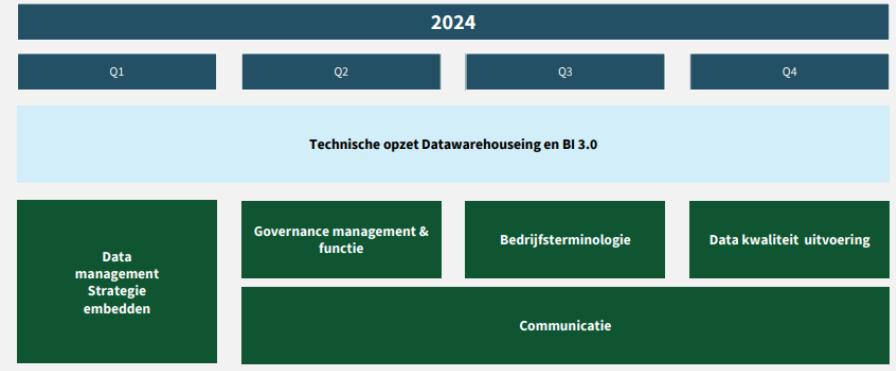

Governance voorstel

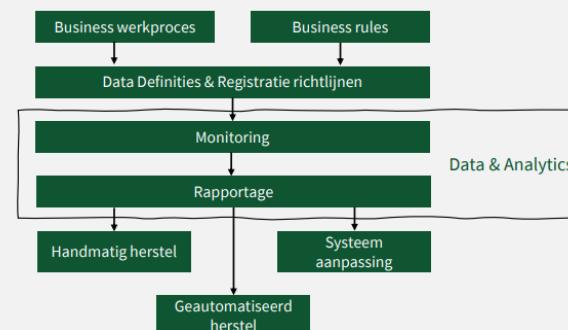

Data governance zorgt voor eigenaarschap, beheer en structuur om bedrijfsdata effectief te beheren als waardevol bedrijfsmiddel.

Roadmap Data strategie

Data stewardship

DE LEADING PRINCIPLES

Ontwerpprincipes zijn **startpunt** voor informatiebeveiliging & architectuur

Ons IT landschap is **modulair** en **schaalbaar**

Ons IT landschap is **toekomst-bestendig** en **up to date**

Wat ons **onderscheidend** maakt, doen we in huis

Wat **generiek** is, kopen we in

| p.31

We werken vanuit **synergie**

Datagedreven **werken** is de norm

Onze data & diensten zijn **24*7 beschikbaar**

Datavolwassenheid Greenchoice 2023

6. Geoptimaliseerd
5. Gemeten
4. Bepaald
3. Beheerd
2. Uitgevoerd
1. Bestaat nog niet
0. Bestaat nog niet weet ik niet

Score 2023: GREEN CHOICE

Doelstelling Datamanagement volwassenheid

Gewenste volwassenheid:
Niveau 3 (Beheerd)

Focus ontwikkeling 2024:

1. Data management strategie
2. Data eigenaarschap
3. Data kwaliteit
4. Definities

| p.6

Data kwaliteit

Een data kwaliteit strategie biedt een organisatie brede aanpak om het gewenste niveau van datakwaliteit te bereiken en te handhaven, ter ondersteuning van doelstellingen. Binnen deze strategie hebben de **Data owner** en de **Data Steward** een belangrijke rol.

Beste Pipi langkous.

The Future of Data & Automation: Your Roadmap for 2025

Als je Data & Automation op de juiste manier integreert, heb je een flinke voorsprong. Maar hoe ga je hiermee aan de slag? Ons evenement, "The Future of Data & Automation: Your Roadmap for 2025", helpt je bij het maken van een heldere en effectieve data roadmap, helemaal up-to-date met de nieuwste trends. Of je nu al een plan hebt voor 2025 of er nog mee moet beginnen, wij zorgen ervoor dat je in 2025 jouw Data & Automation naar een hoger niveau kunt tillen.
